

INVESTMENT PLAN

The investment objective of the fund is to achieve above-average appreciation of the entrusted funds over a longer time horizon by investing in capital markets according to the EnCor investment model. The fund allocates funds to all major asset classes, in particular equities, bonds, commodities and money market instruments. The fund invests primarily in cost-effective index funds (ETF/ETC), but also in individual equities, bonds and other instruments, mainly in CZK, EUR and USD. Interim returns are reinvested and further appreciated. The fund does not follow any benchmark, but targets an absolute return that outperforms a fixed income portfolio (70% equities / 30% bonds) over the long term while having lower volatility.
