RECOMMENDED HOLDING TIME

Investment horizon: 2 years

The investor is advised to hold the product for at least 3 years. This is an investment in a portfolio of high quality corporate bonds and debt instruments with a relatively safe yield and a manageable risk-return profile. The bond portfolio may nevertheless be subject to short-term volatility associated with market (interest rate) risk or the realisation of credit risk on sub-issues. To offset these fluctuations, an investment time horizon as described above is recommended. Early redemption of the product may force early or unfavourable monetization of the fund's assets, which may adversely affect the value of the product.

- early redemption may be made at the time of an adverse price situation in the market for the underlying assets;

in the case of early redemption, the valuation of the product may be significantly different from the valuation in the case of a sale of the underlying assets at the time of the planned investment horizon of the fund.
